

SKINCERITY NIGHTLY BREATHABLE MASQUE

SKINCERITY® NIGHTLY BREATHABLE MASQUE seals in your own natural moisture to deeply hydrate your skin. While the Breathable Barrier® allows vital oxygen molecules to penetrate the barrier, it holds in moisture to rejuvenate your skin's appearance.

Skincerity enhances your skin's barrier function and natural ability to retain moisture. Applied as a liquid, Skincerity forms perfectly to the contour of your skin as it dries, mimicking the outermost layer of skin. Because skin typically demonstrates higher loss of moisture during the nighttime, Skincerity restores the natural balance of your skin while you sleep by trapping the water that normally evaporates from your body and using the retained moisture to bathe your skin in hydration.

CLINICAL STUDY PROVES SKINCERITY WORKS!

Clinically tested and dermatologist recommended, Skincerity's key ingredients include Vitamin E and Grapeseed Oil, making it safe to use on most skin tones and skin types. Skincerity can be used on the face, hands, neck and chest to help with the visible signs aging, and clinical studies have proven that regular use of the product results in a reduction in the appearance of wrinkles.

A study evaluated by the University of Texas Health Science Center in San Antonio, Texas, indicated that the majority of participants (67%) using Skincerity for 90 days experienced a dramatic visible improvement in skin tone and texture, and a reduction in the appearance of fine lines and wrinkles.

SKINCERITY RECOMMENDED USAGE

When you begin using Skincerity, apply at bedtime every night for a minimum of two weeks to speed rejuvenation. Roll on a thin layer of Skincerity (do not rub in) at bedtime. In the morning, remove remaining film. If Skincerity is difficult to remove from specific areas, apply (and let dry) a small amount of moisturizer first.

SKINCERITY INGREDIENT LIST

Acetone, Fluoropolymer, Tocopherol Acetate (Vitamin E), Acrylic Polymer, Water, Vitis Vinifera (Grapeseed) Oil, Fragrance.

SKINCERITY is non-toxic and can be used for all skin types. An FDA-recommended test verified that the barrier technology causes no irritation to the skin. This clinical study was completed under grants from the National Institutes of Health (SBIR No. AR44435).
